FOOTNOTES

* **Total of Taxa:** SPECIES + SUBSPECIES

Names in red indicate species here recorded for the first since the last published version of this List: first geographic record for Brazil; new described taxa; revalidated taxa; subspecies elevated to the species level.

TAXA EXCLUDED FROM THE CUTRENT VERSION OF THE LIST:

***Amphisbaena albocingulata* Boettger, 1885:** After a taxonomic revision, it was observed the lack of records of this species in Brazil, and the occurrence of *A. darwini* Duméril & Bibron, 1839 was confirmed. See Perez, R., S. Ribeiro & M. Borges-Martins. 2012. Reappraisal of the taxonomic status of *Amphisbaena prunicolor* (Cope 1885) and *Amphisbaena albocingulata* Boettger 1885 (Amphisbaenia: Amphisbaenidae). *Zootaxa* 3550: 1–25.
